QUALITY CERTIFICATIONS

In Teka, quality is a must. We invest in the best materials and carefully supervise the production process to ensure that the products reaching the market are outstanding. Our products' high quality is demonstrated by the certificates and approvals obtained in the most demanding markets: Germany (LGA, DVGW), France (NF), Norway (NBI), Denmark (VA), and Spain (AENOR).

All Teka cartridges use sintered ceramic discs of high resistance. These discs all have porous surfaces which retain the grease longer, helping to achieve smoother, gentler movements and therefore prolonging the life of your taps. The operating gear is insulated from water, allowing for continuous lubrication. All our cartridges also incorporate a device that regulates temperature and limits the water flow.

HOT WATER LIMITER

WATER SAVING

By adjusting the temperature control ring.

ANTI-SCALDING

Avoids very high temperatures.
